Power supply for KNX radio appl. Module

Power

- low intrinsic energy requirement

Network configuration

- as supply for radio application modules

Measurement

Relative humidity (without condensation)	0	65 % (without condensation)

Materials

Material	Plastic/metal

- no conductive connection between supporting ring and spreading claws

Dimensions

Insertion depth	22 mm

Installation, mounting

- with spreader claws

Connection

Number of contacts	1

- with screw terminals

Use conditions

Operating temperature	-5	45 °C

Identification

Application, usage	KNX radio- operating systems
Main design line	Electronics platform
Secondary design line(s)	Berker.Net

Instructions

- Motion detector application modules in conjunction with a network insert can only be used as a motion detector extension unit (slave).

For this purpose, a motion detector application module with a relay insert must be installed as a motion detector main unit (master) (order no.: 8512 12 00).
